Appendix A Information Required With Applications

A-1. In general.

- (a) As provided in section 35-49, it is presumed that all of the information listed in this appendix must be submitted with an application for a zoning, sign, or special use permit to enable the permit-issuing authority to determine whether the development, if completed as proposed, will comply with all the requirements of Chapter 35. As set forth in section 35-92, applications for variances are subject to the same provisions. However, the permit-issuing authority may require more information or accept as sufficient less information, according to the circumstances of the particular case. A developer who believes information presumptively required by this appendix is unnecessary shall contact the planning staff for an interpretation.
- (b) As also provided in section 35-49, the administrator shall develop application processes, including standard forms, to simplify and expedite applications for simple developments that do not require the full range of information called for in this appendix. In particular, developers seeking only permission to construct single-family houses or duplexes or to construct new or modify existing signs should contact the administrator for standard forms.

(Ord. No. 813, § 1, 6-3-85)

A-2. Written application.

Every applicant for a variance or a zoning, sign, or special use permit shall complete a written application containing at least the following information:

- (1) The name, address, and phone number of the applicant.
- (2) If the applicant is not the owner of the property in question, (i) the name, address, and phone number of the owner, and (ii) the legal relationship of the applicant to the owner that entitles the applicant to make application.
- (3) The date of the application.
- (4) Identification of the particular permit sought.
- (5) A succinct statement of the nature of the development proposed under the permit or the nature of the variance.
- (6) Identification of the property in question by street address and tax map reference.
- (7) The zoning district within which the property lies.
- (8) The number of square feet in the lot where the development is to take place.
- (9) The gross floor area of all existing or proposed buildings located on the lot where the development is to take place.

(10) If the proposed development is a multifamily residential development, the number of one-, two-, three-, or four-bedroom dwelling units proposed for construction.

(Ord. No. 813, § 1, 6-3-85)

A-3. Development site plans.

Subject to section A-1 of this appendix, every application for a variance or a zoning, sign, or special use permit shall contain plans that locate the development site and graphically demonstrate existing and proposed natural, manmade, and legal features on and near the site in question, all in conformity with sections A-4 through A-6 of this appendix.

(Ord. No. 813, § 1, 6-3-85)

A-4. Graphic materials required for plans.

- (a) The plans shall include a location map that shows the location of the project in the broad context of the city or planning jurisdiction. This location map may be drawn on the development site plans or it may be furnished separately using reduced copies of maps of the Lumberton planning jurisdiction available at the planning and neighborhood services department.
- (b) Development site plans shall be drawn to scale, using such a scale that all features required to be shown on the plans are readily discernible. Very large developments may require that plans show the development in sections to accomplish this objective without resort to plans that are so large as to be cumbersome, or the objective may be accomplished by using different plans or plans drawn to different scales to illustrate different features. In all cases, the permit-issuing authority shall make the final determination whether the plans submitted are drawn to the appropriate scale, but the applicant for a special use permit relies in the first instance on the recommendations of the administration.
- (c) Development site plans should show on the first page the following information:
 - (1) Name of applicant;
 - (2) Name of development (if any);
 - (3) North arrow;
 - (4) Legend;
 - (5) Scale.
- (d) All of the features required to be shown on plans by sections A-5 and A-6 may be included on one set of plans, so long as the features are distinctly discernible.
